

"Over three years ago, we made a targeted federal investment in Zethus Software. And with today's announcement, our community will reap the benefits of that investment. Once again, a local company is stepping out onto the global stage. Zethus embodies our short- and long-term economic strategy: investment in the development of new technologies and public-private partnerships, and the utilization of universities as engines for private sector job creation. This new partnership will continue to highlight the Mahoning Valley's world-class business environment, world-class talent, and world-class universities," stated Congressman Ryan. **"We congratulate all of the great talent at Zethus, and offer our continued support as they lead the great economic revival of our community."**

From Zethus Software:

Bruker AXS and Zethus Software Signs Worldwide Strategic Partnership

Munich, Germany and Youngstown, Ohio -- March 23, 2010 – Zethus Software, a leader in cloud storage technology and a Youngstown Business Incubator Portfolio company announces a worldwide strategic alliance with Bruker AXS. Under the terms of the agreement Bruker will strategically collaborate on an ongoing basis with Zethus in implementing and distributing the

Zethus Cumulus CyberLab technology with Bruker AXS' X-ray instruments.

"We are extremely pleased in our partnership with Bruker AXS," said Brad Myers, CEO of Zethus. "It validates our innovative technology and establishes our reach on a worldwide level."

Bruker AXS will strategically partner with Zethus Software to enable its advanced scientific instruments and data remotely accessible from anywhere in the world. The cutting-edge technology creates secure, virtualized data storage and remote instrument use in laboratories with small plug-and-play network appliances. The integration of scalable, managed data storage into the unified secure service is an essential and novel capability of cumulus CyberLab.

About Zethus Software, LLC

Zethus Software is a privately-held software development company focused on developing innovative solutions using grid and cloud computing technologies. Founded in 2003, the company's customers include Fortune 1000 companies as well as significant educational and institutional clients.
